(54) Title: IVT COMPONENT

(57) Abstract: IVT component, comprising an input and an output disk. Each disk is provided with a raceway and raceways of the input and output disk are faced to each other. The rollers are provided in between. The rollers have a surface engaging the raceways and the position of the power rollers relative to the disks can be changed in order to change the transmission ratio between the disks. At least one of the disk or power rollers are produced from a PM M62 type steel.
